PREMIUM QUALITY SHADE STRUCTURES

INSTALLATION PRICE LIST

A sail shade structure is a unique structure designed to make an ordinary environment extraordinary, whilst providing valuable protection from the harsh effects of the sun. Constructed from extra strong, commercial grade knitted fabric, providing up to 98.8% UV block our pre-made and custom made shade sails are built to stand up to the toughest conditions.

The company, Shaded Nation, introduces this product to the UK as the sole distributor of a range of high quality shade sails created by the Australian manufacturer, Sail Shade World, one of the first manufacturers of shade sails and a pioneer in this field with over 50 years combined experience in the field.

Shade sails can be used to provide shade over pools, spas, barbeques, patios, decked areas, children's play areas, sand pits and also can be used as a car port. Shade sails are commonly used in public spaces outside, such as commercial centres, car parks, community spaces, creches, schools, playgrounds and sports venues. Shade sails can also be installed in the front of large openings in order to reduce inside temperatures of a building.

Approved by specialists in the search of a cure for cancer, our shade sails protect you from up to 98.8% of the sun's harmful rays. They bring a touch of modernity; look aesthetically stunning and contemporary whilst being extremely practical. Shade sails as a means of shading, are the perfect solution to create a stylish ambiance and originality to any outdoor space where the design possibilities are endless.

PREMIUM QUALITY SHADE STRUCTURES

INSTALLATION PRICE LIST

If you demand quality without compromise, service that is second to none and the knowledge that you are dealing with a global leader in the manufacture of shade sails, then your only choice for your shade sail requirements is sail shade world.

All your shades are made using brand new equipment, the latest techniques and technology, with every detail having been thought of:

- Heavy Grade Commercial Knitted Fabric - providing quality that looks and feels great
- Seatbelt Edge Webbing - instead of the usual turned and sewn hem used by other companies, SSW use extra strong seatbelt edge webbing, ranging from 35mm to 50mm (1.5" to 2") around the perimeter of their shade sails
- Interlocked and double stitched seams - ensures corners will not fail
- Anti Rust Rings - corners feature upto 10mm thickness, 316 marine grade stainless steel attachment rings
- UV Stabilised Thread - the stitching on our shades will not deteriorate in the sunlight
- 10 Year Warranty - 10 year warranty against and UV degradation on the fabric colour fade
- All our structures are fully engineered and insured against British Standards and Eurocodes

Bespoke Shade Structures

Price on Application

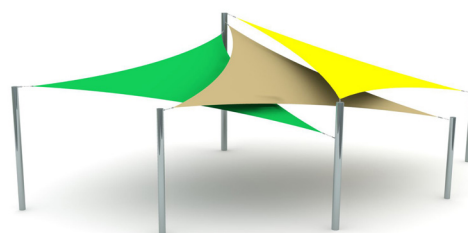

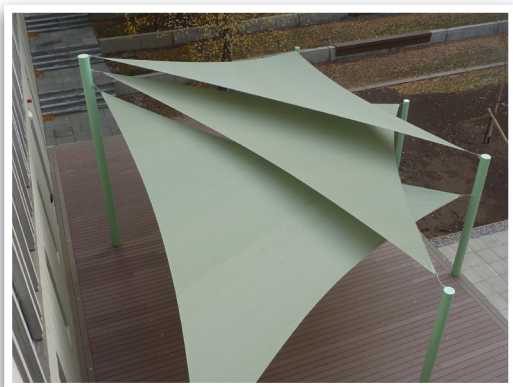

Why not talk to us about a bespoke shade structure.

As bespoke structures make up nearly 80% of our business, our in-house design and engineering team are very experienced. We are always happy to advise on irregular shade geometrics and support conditions where those are necessary, and will work with you to find a safe and stylish solution that fits your needs, and budget perfectly.

For inspiration, here are some of our most recent designs. Please feel free to ask for photographs of our completed projects.

Shade Canopy

Premium quality shade sails, the BEST IN THE WORLD, manufactured by Sail Shade World. Constructed from heavy duty knitted shade cloth, with a 220gsm density and up to 90% UV protection

- Showerproof fabric available in a range of 4 attractive, contemporary colours
- Harmful UV rays are blocked by up to 90%
- Breathable allowing air circulation for a cooling effect, resulting in reduction in temperature under the shade sail
- Rust resistant 316 grade stainless steel fixings
- 1.5" colour keyed seatbelt edge webbing, unaffected by moisture and natural temperature extremes and a superior solution when compared with the usual turned and sewn border
- Colourfast, will not rot, develop mildew, shrink, fray or tear
- Structurally engineered to British Standard safety specifications and Eurocodes
- Semi-permanent shades must be removed in advance of the onset of adverse weather conditions

Columns

- Manufactured to structural engineering recommendations using high tensile steel grades BS EN 10025 / 10210 S355
- Hot dip galvanised to BS EN 1461: 1999 and comes with a 10 year anti-corrosion warranty
- Rust is not a risk on our posts as there are no drilled areas where water can seep into
- Welded lugs and caps eliminating the need for replacement of plastic and rubber alternatives offered by others

Plus this guarantee for "Peace of Mind"

- 10 year warranty on posts against mechanical failure and perforation caused by corrosion*
- 10 year UV and colour fade warranty
- 1 year workmanship warranty
- Maintenance on our structures is minimal and easy to carry out
- Comprehensive Operation and Maintenance manuals are provided as standard with all our shade structure installations to ensure your structure remains safe, and in sound condition for many years to come

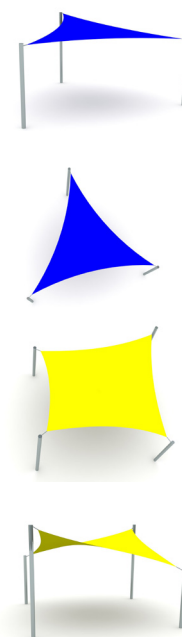

Prices based on soil conditions no worse than a soft clay as described in BS 8004 and all mainland UK locations up to 100m above sea level. All prices are subject to fluctuation of steel prices and foreign currency exchange rates. All prices shown are ex VAT. Final specification and prices subject to engineering review.

Shade Canopy

Custom made commercial shade sails, the BEST IN THE WORLD, manufactured by Sail Shade World.

Constructed from heavy duty, COMMERCIAL 95 knitted shade cloth, made by Gale Pacific with a 340gsm density and up to 98.8% UV protection

- Showerproof fabric available in a range of 14 colours to suit natural and contemporary colour preferences
- Harmful UVA and UVB rays are blocked by up to 98.8%
- Breathable allowing air circulation for a cooling effect, resulting in reduction in temperature under the shade sail
- Rust resistant 316 grade stainless steel fixings
- Seatbelt (2") edge webbing, sewn around the perimeter, unaffected by moisture and natural temperature extremes and a superior solution when compared with the usual turned and sewn border, or those with wire inserts
- Colourfast, will not rot, develop mildew, shrink, fray or tear
- Life expectancy 15 - 20 years

Engineering

- The "Safe Shade" range of structures can stay up all year round, and are designed to withstand the maximum wind loads expected in the particular geographical region
- Maximum snow load requirements of each region are also taken into account in the design of the "Safe Shade" range of structures.

Columns

- Manufactured to structural engineering recommendations using high tensile steel grades BS EN 10025 / 10210 S355
- Hot dip galvanised to BS EN 1461: 1999 and comes with a 10 year anti-corrosion warranty
- Rust is not a risk on our posts as there are no drilled areas where water can seep into
- Welded lugs and caps, eliminating the need for replacement of the plastic and rubber alternatives offered by others

Plus this guarantee for "Peace of Mind"

- A postcode specific engineering review is carried out for each "Safe Shade" structure supplied and installed
- 10 year warranty on posts against mechanical failure and perforation caused by corrosion
- 10 year UV and fade warranty on the shades
- 1 year workmanship warranty
- Maintenance on our structures is minimal and easy to carry out
- Comprehensive Operation and Maintenance manuals are provided as standard with all our shade structure installations to ensure your structure remains safe, and in sound condition for many years to come
